EDITORIAL NOTE (KALIKUMISHO)

lyā tikitiwile na ba Tokotela Wim Van Binsbergen

The Nkoya text in this volume forms the outcome of a long and painstaking editorial process, in which the concerns of those in contemporary Zambia who identify as Nkoya have been combined with the international standards of scholarship.

The present volume does not in itself document this editorial process nor justify the innumerable decisions taken in its course; that task has been reserved for the companion volume: Likota lyā Bankoya/The History of the Nkoya People, an extensively introduced, annotated and indexed scholarly edition published under my editorship by the African Studies Centre, Leiden (The Netherlands), simultaneously with this Nkoya version.

The present book offers but the final results of the concerted efforts of a number of people striving towards a clear and unequivocal text which keeps as closely as possible to the original manuscript as written in the 1950s-1960s, while at the same time adhering to such standards of vocabulary, consistency, cultural awareness and national Zambian responsibility as have developed in the Nkoya-speaking community in more recent decades.

In the course of this process, which has enjoyed the full and patient support of the people from Zambia's Kaoma district, their traditional leaders Mwene Mutondo and Mwene Kahare, and the district's modern officeholders, the following people have contributed specific essential services towards the materialization of the present book and its companion volume:

— Mr. Denis Kawangu Shiyowe, of Shumbanyama village, Kaoma district, who was the first to attract and stimulate scholarly interest

in the Nkoya language and culture in the early 1970s; he taught me the language and was my research assistant in the years 1972-1974.

— *Mr. Hamba M. Mwene, of Lusaka, who preserved the manuscript of Likota lya Bankoya, and passed it on to me in 1976 with the purpose of having it published on behalf of the Nkoya-speaking people; Mr. Mwene has been most helpful throughout the various stages leading towards the editing and publication of the Likota manuscript. To acknowledge this contribution, a preface and appendix lists by Mr. Mwene have been included in the present edition—duly italicized in order to distinguish these contributions from Rev. Shimunika's text itself.*

— *Mr. Masuku Malapa, of Lusaka, who by making a first draft translation of the manuscript into English enabled me to penetrate the Nkoya text more fully and to create a scholarly context within which the Nkoya version could be published as a separate volume.*

— *Mr. Davison Kawanga, of Kaoma, whose companionship and guidance as from 1977 has enabled me to broaden and deepen my approach to the Nkoya language and the people speaking it, and who has made specific contributions to the editorial process.*

— *Mr. Jackson Shimunika, of Luampa, who especially after his father's death in 1981 assisted the editorial process in various ways.*

— *The Institute of African Studies, University of Zambia, Lusaka, which has inspired, supported and facilitated my research on Western Zambia as from 1972.*

— *The African Studies Centre, Leiden, which as from 1977 made substantial contributions (in both working time, technical facilities and publication funds) towards this edition and towards my research on Western Zambia in general; without the enthusiastic support of this institution's General Secretary Mr. G. Grootenhuis, its Bursar Mr. J. Nijssen, and its computer specialist Mr. R. Niemeijer, the present volume could never have been produced.*

— *While expressing my thanks to all those mentioned here, I wish to include those who, in my personal life since 1972, in The*

EDITORIAL NOTE (KALIMUKASHO)

Netherlands as well as in Zambia, have lived with me through the various phases of my research on Western Zambia, sharing its delights and its burdens, and contributing to its final outcomes.

A decisive stage in the editorial process was reached when in August 1985 the first proofs of the present volume and its companion became available for correction.

Then

- (1) *Mr. M. Malapa and*
- (2) *Mr. H. Mwene*

contributed their own full sets of corrections and queries.

At the same time, in Kaoma, Mr. D. Kawanga organized (3) an editorial committee which submitted their own combined set of corrected proofs; the members of this committee were: Mr. David Kapungu, Ms. Ruth M. Kashompa, Mr. Davison Kawanga, Mr. Enoch Mulando, Mr. Powell Munengo, Mr. Dominic D. Mupishi, Mr. M.S. Mutupa, Ms. Mary Nalishuwa, Mr. Amon N. Njenjema, and Mr. Moffat R. Tumbila.

Similarly, Mr. Jackson Shimunika organized, in Luampa, (4) an editorial committee consisting of Rev. Shimunika's sometime associates in Bible translating: Mr. H. Katete, Mr. M. Kayoya, Mr. H.M. Kazekula, along with Mr. Jackson Shimunika himself; this committee jointly contributed a set of corrected proofs, too.

This remarkable response, across linguistic and geographical distances and despite pressures of time, money and wavering postal services, enables us to look at this book as more than one individual author's work and one foreign scholar's editing: Likota lya Bankoya as it presents itself to the reader here, can be truly said to be realized by, and endorsed by, the Nkoya-speaking people themselves.

None the less, I accept responsibility for such editorial contradictions and disagreements as this final product may yet entail.

For in cases where the corrections and directions from the four different sources as indicated above did not match, it was me who decided on the final rendering — in ways accounted for in the companion volume, which also fully documents Rev. Shimunika's original text as it was before editing.

Specifically, only corrections proposed from more than one source were incorporated in the final text of the present book, with this proviso that my own (necessarily incomplete) knowledge of the Nkoya language, and the historical materials on Western Zambia which I collected over the years, were occasionally invoked as an additional fifth source.

I decided to apply rules of editorial consistency in such matters as: Nkoya orthography, the rendering of proper names (where a Nkoya spelling has been applied throughout), the exclusion of such English and Lozi words as Rev. Shimunika's original manuscript contained, the identification (through quotation marks) of passages of direct speech, punctuation in general, word separation (which given the concatenative structure of this Bantu language is a subject of confusion even to 'native speakers'), word division at the end of lines, etc. On these points the present text can only be tentative: not only because it was edited by a non-'native speaker', but also because one cannot expect a language's orthographical and editorial conventions to have already fully crystallized by the time when the texts published in it can still be counted on the fingers of one hand.

Of course I realize that any systematic editing means the regrettable and politically questionable imposition of alien consistence and tedious 'improvements' upon Rev. Shimunika's highly personal and effective style, in which the author single-handedly pioneered between Nkoya oral conventions (where context takes the place of punctuation, and direct and indirect speech merge) and stilted Biblical models, with Lozi and English words, and numerous enumerations of names and other items, thrown in for extra effect, clarity and authority. The full range of these idiosyncrasies has

EDITORIAL NOTE (KALIMUKASHO)

been preserved in the scholarly companion volume. When in the present, popular edition only the results of this editorial process have been given, it is clearly not for reasons of cultural imperialism or academic hegemony, but in order to acknowledge the growth of awareness, self-confidence and literary competence which — partly as a result of Rev. Shimunika's own impact — has characterized the Nkoya-speaking community in recent decades. The standards which Rev. Shimunika was so obviously still struggling to invent, are now expected to be applied, as a matter of course, by the Zambian expert readers who advised and shared in the editorial process. In this form the edited text can have an impact also on those younger and future members of the Nkoya-speaking community who have been less exposed to neo-traditional rural culture than the readership Rev. Shimunika may have had in mind in the first place. Yet it must be realized that these impositions, however justified, do distort the very pattern of thought and discourse of Rev. Shimunika's account, and conceal much of its symbolic richness and multi-interpretability.

My two main reference points are: the Nkoya-speaking community, and a historicizing social science; the sheer efforts to negotiate between these two left no room, nor indeed time, for specific professional linguistic considerations. Students of Bantu languages will find that if their discipline's conventions have been applied, it is almost by accident. It is hoped that the present edition may yet stimulate their further research on the Nkoya language.

All this concerns the form in which Likota lyā Bankoya has now been preserved. Another matter of form is the typographical layout of the book as a Bible: Rev. Shimunika's most obvious point of reference, painstakingly imitated in his own manuscript and therefore faithfully rendered in the present edition as well. More is involved here than Christian piety: for many years the New Testament and Psalms (Testamenta ya Yipya/Nyimbo) have consti-

WIM VAN BINSBERGEN

tuted the only major text widely available in Nkoya; and Rev. Shimunika was their principal translator.

As for the book's contents, the historical visions it evokes and the historical claims it makes, it should be clear that my responsibility as an editor ends at the moment when, by publishing this text, I have made it available to the various audiences (the Nkoya-speaking people, the Zambian nation in general, the scholarly community) who can now begin to study and discuss it. I have been making my own contributions to that discussion in a different context than the present volume, and may refer the reader to the companion volume and the references cited there. History is never the mechanical if accurate account of past events, but always and everywhere the transformation of such an account in the light of specific present and future concerns; in this sense Likota lya Bankoya is an important contribution to Zambian history, worth every moment of the many months its editing and analysis has taken.

This Nkoya edition is intended primarily as a service to the Nkoya people and indeed to the Zambian nation as a whole. It presents a lengthy and seriously edited text in one of Zambia's languages, and evokes significant aspects of the past of Western Zambia, in such a way as to be as accessible as possible to the local people whose very lives, mother tongue, past, ancestors and identity are enshrined in this text.

At the same time this book is hoped to erect a lasting monument for one of Zambia's great sons, Rev. Johasaphat Malasha Shimunika (c. 1898-1981), clergyman, Bible translator, kinsman of the Mutondo royal family, historian and above all teacher and guide of his people. We have been most fortunate that the author could still participate in the early stages of editing (in 1977), casting light on his sources and methods, and identifying the body of his authentic text from among later unauthorized additions. However, after a

EDITORIAL NOTE (KALIMUKASHO)

long and most fruitful life he passed away before our task could have been completed.

We have sought to prepare and publish this edition in his spirit.
